DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
 - REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The specification lacks section headings.

Application/Control Number: 09/837,050

Art Unit: 2643

1. The disclosure is objected to because of the following informalities: The specification should not contain references to specific claims, e.g. page 5, line 28.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 3-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Feng et al. (US 2001/0031053 A1, hereinafter "Feng").

Regarding claims 1, 4, 9, Feng discloses a method for analyzing an acoustical environment comprising:

registering acoustical signals at at least two reception locations (microphones 22 and 24 are mutually distant by a distance D; Figure 12);

calculating electronically at least one of the distances of sources of acoustical signals with respect to at least one of said locations (a distance r_R from source S1 to right microphone 24 is calculated as well as a distance r_L from S1 to left microphone 22; page 8, paragraph 90);

amplitude filtering (K is chosen to provide a convenient amplitude level; paragraph 94); weighing a signal, thereby generating an output signal... (equalization factors are calculated to calibrated for asymmetries in the sensors; paragraphs 93-96).

Application/Control Number: 09/837,050

Art Unit: 2643

Regarding claims 3, 5, 12-13, note filters 32a, 32b (Figure 2).

Regarding claims 6, 10, microphones 22 and 24 are a part of a hearing aid system 110 (page 6, paragraph 72).

Regarding claims 7, 11, note analog to digital converters 34a, 34b (Figure 2).

Regarding claims 8, 11, note Discrete Fourier Transform stages 36a, 36b (page 4, paragraph 48).

Regarding claim 14, note dual delay line 40, switch 80, and localization 70 (Figure 2).

Regarding claim 15, note Inverse DFT 82, D/A 84, AMP 92 and speaker 94 (Figure 2).

Allowable Subject Matter

4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamaguchi et al. and Hou show other hearing aid devices with multi-microphone directional processing.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (703) 305-4395. The examiner can normally be reached on Monday-Tuesday, Thursday-Friday.

Art Unit: 2643

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (703) 305-4708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
